MISSION FIELD REPORT

FIRST PHASE OF CONSTRUCTION OF SCHOOL ROOMS

Grace and peace!

Gratitude - We first want to thank God for all the work he has helped us accomplish so far. Despite the enormous difficulties and struggles, we have seen and lived god's move every day. Our love and fidelity have never been lacking! So, we give him all honor and glory!

We cannot fail to thank all of our partners who have supported us so far in any way, but especially our brothers in the United States, who have truly made a commitment to invest in the realization of our dreams.

Thank you so much my dear brothers Grace and Travis. Your support is not in vain. You helped us a lot. I believe with all my heart that what we are planting today will certainly bear much fruit. Therefore, I encourage you to continue planting with us.

God bless you always and very much!

Consolidation, growth and innovation: These are the words that can sum up the years of activities of this ministry and the support of our partners spread throughout the various corners of the planet.

If we look closely, we will realize that the investment of almost a decade has already begun to bear fruit in various areas within Guinean society. In addition to our contribution to the process of education of children and young people in the country, we are also creating job opportunities for the people, and in a way, we are gradually reducing their suffering and of course that of their families as well.
